"12 most amazing Bridges ever built"

"Everything You Always Wanted to Know About Structural Engineering"

Less than a month to go!

Join us in Bath to discuss the whole area of creativity in design and the collaborative processes that generate innovation and design excellence in the built environment!

An exciting two days programme is awaiting you with plenary sessions, three parallel lecture streams, seminar sessions and a series of hands on design workshops facilitated by experienced industry practitioners. You can now view the workshop programme [here](#). **Workshop** space is limited and available to pre-book at [registration](#) and will be allocated on a first come first served basis.

The following invited **Keynote Speakers** will address the conference theme in the plenary sessions. We look forward to seeing you in Bath!

IABSE Kuala Lumpur 2018

Call for Abstracts by: **April 30, 2017**

Tomorrow's Megastructures

September 19-21, 2018

Preliminary Invitation

- Megastructures: a radical paradigm shift or simply a change of scale?
- Today's and tomorrow's megastructures and megaprojects
- New trends for innovations in the construction, the preservation, the exploitation and the upgrading of structures.

These are the main themes that will be discussed at the 40th IABSE Symposium organised by the French Group of IABSE in cooperation with the French Association for Civil Engineering (AFGC).

We invite you to share your experiences with today's megastructures and to present your vision of tomorrow and your prospect of future outstanding structures. The web-based paper submission platform will be opening soon in April for authors wishing to present their paper in accordance with the themes and topics of the Symposium.
